

SHEHZAD ALI

Full-Stack Developer | AI Engineer | Generative AI & Cloud Solutions

Lahore, Punjab, Pakistan • +92 325 5938122 • shehzaddev012@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Full-Stack & AI Engineer specializing in end-to-end development with React, Next.js, Node.js, and Python (FastAPI / Django). Strong focus on system design, microservices architecture, and cloud-native solutions across AWS, Docker, and Kubernetes. Hands-on experience building production-grade REST & GraphQL APIs and AI-driven systems — including LLM integrations and Retrieval-Augmented Generation (RAG) pipelines, intelligent assistants, and data-driven applications. Passionate about solving complex engineering problems, optimizing performance, and delivering scalable, future-ready products.

EXPERIENCE

AI Engineer & Full-Stack Developer — Softerio Solutions

Jul 2025 – Present

Pakistan

- Designed and developed AI-powered full-stack applications using React / Next.js with scalable backend services in Python (FastAPI) and Node.js.
- Built Retrieval-Augmented Generation (RAG) systems using vector databases and LLMs for intelligent knowledge retrieval over large datasets.
- Developed AI-driven microservices and REST / GraphQL APIs using a cloud-native architecture.
- Implemented AI agents and automation workflows using LangChain and modern LLM frameworks.
- Integrated NLP capabilities — semantic search, summarization, and text classification — into production systems.
- Deployed containerized applications using Docker and AWS, ensuring scalability, reliability, and high availability.
- Optimized API latency, system performance, and infrastructure cost for production workloads.

Full-Stack Developer — OCI LAB

Jan 2023 – Jul 2025

Lahore, Punjab, Pakistan

- Built and maintained full-stack web applications with React / Next.js front-ends and Python / Node.js backend services.
- Designed and shipped production-grade REST & GraphQL APIs, with a focus on performance and reliability.
- Applied microservices and cloud-native patterns (AWS, Docker) to deploy scalable, high-availability services.
- Optimized database queries and system performance for high-traffic, large-scale workloads.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript
Frontend	React.js, Next.js, Redux, HTML5, CSS3
Backend	FastAPI, Django, Node.js, Express.js, REST APIs, GraphQL, Microservices
AI / GenAI	LLM integration, Retrieval-Augmented Generation (RAG), LangChain, AI agents, vector databases, semantic search, NLP, prompt engineering
Cloud & DevOps	AWS, Docker, Kubernetes, CI/CD, Linux

Databases

PostgreSQL, MySQL, MongoDB, Redis, vector DBs

Tools

Git, ClickUp, Agile / Scrum

KEY PROJECTS

AI Knowledge Assistant & RAG Platform*Python, FastAPI, LangChain, Vector DB, React*

- Built an enterprise-grade intelligent assistant that answers questions over 100K+ internal documents using a Retrieval-Augmented Generation (RAG) pipeline with vector search and LLMs.
- Implemented semantic search, summarization, and source-cited responses, reducing manual knowledge lookup time by ~80% (from minutes to seconds).
- Delivered a responsive React / Next.js chat interface backed by FastAPI services, containerized with Docker and deployed on AWS for high availability.

Cloud-Native Microservices Backend*FastAPI, Node.js, GraphQL, PostgreSQL, Docker, AWS*

- Designed a microservices architecture with REST & GraphQL APIs serving a high-traffic application with 99.9% uptime.
- Added Redis caching, asynchronous processing, and optimized PostgreSQL queries, cutting average API response time by over 50%.
- Deployed independently scalable, containerized services with CI/CD pipelines for reliable, zero-downtime releases.

AI Agent & Workflow Automation System*Python, LangChain, LLMs, REST APIs*

- Developed LangChain-based AI agents that automated repetitive manual workflows end-to-end, saving the team several hours per week.
- Integrated multiple third-party APIs and NLP tasks (classification, extraction, summarization) into a single orchestrated pipeline.
- Exposed the automation through clean, well-documented REST APIs consumed by a Next.js front-end dashboard.

EDUCATION

Bachelor of Technology, Computer Science — University of Management and Technology (UMT)*Jul 2014 – Jul 2018*

Lahore, Pakistan
