

SHEHZAD ALI

Python Backend & GenAI Engineer

shehzaddev012@gmail.com | +92 325 5938122 | Lahore, Pakistan (open to remote)

[LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years building scalable backend systems and AI-powered applications. Specialist in Python and FastAPI, with production experience designing RAG pipelines, LLM integrations, and AI agents using LangChain and vector databases. Strong full-stack capability (React/Next.js) and a track record of shipping containerized services to AWS for distributed, remote-first teams across the UK and Europe. Experienced team lead focused on performance, reliability, and clean architecture.

CORE SKILLS

Core (expert): Python, FastAPI, REST API design, Microservices, PostgreSQL, Docker, AWS, React.js / Next.js

AI / GenAI: LLM application development, Retrieval-Augmented Generation (RAG), LangChain, AI agents, vector databases (Pinecone, Weaviate, FAISS, ChromaDB), semantic search, NLP, OpenAI / Anthropic APIs, prompt engineering

Backend & Data: Asynchronous programming, JWT / OAuth2, webhooks, third-party API integration, Pandas, NumPy, Celery, SQLAlchemy, Pydantic, Redis caching

Frontend: React.js, Next.js, TypeScript, Node.js, Express.js, Redux

DevOps: Docker, CI/CD (GitHub Actions, GitLab CI), Terraform, Prometheus, Grafana, Linux / Bash

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, DynamoDB

Leadership: Team leadership, technical mentoring, code review, cross-functional collaboration, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer — AI & Intelligent Systems

OCI-LAB | Jul 2025 – Present | On-site, Pakistan

- Designed and shipped AI-powered full-stack applications combining React/Next.js frontends with scalable Python/Node.js backend services serving 10,000+ users.
- Built production Retrieval-Augmented Generation (RAG) pipelines over 1M+ documents using vector search and LLMs, cutting knowledge lookup time by 80% (from minutes to milliseconds).
- Developed LangChain-based AI agents and automation workflows that replaced repetitive manual processes.
- Containerized and deployed services on AWS with Docker, reducing API latency and infrastructure cost by 60%.

Senior Python Developer — Team Lead

Grid Dynamics | Jul 2022 – Jul 2025 | Remote, United Kingdom

- Led a team of 14 backend and full-stack engineers, owning task assignment, code review, and engineering standards.
- Architected high-performance FastAPI microservices handling 1M+ requests/day at 99.9% uptime.
- Built Pandas-based data processing pipelines that reduced report generation time by 85%.
- Mentored 6 junior developers and supported their technical growth while improving overall application performance and scalability.

Full-Stack Developer

OCTO Technology | Dec 2019 – Jul 2021 | Remote, France

- Built and maintained REST APIs with Django, Flask, and FastAPI powering production features.
- Developed responsive React.js interfaces and reusable components, improving application performance by 75%.
- Optimized PostgreSQL queries for high-traffic endpoints to reduce average response time.

Full-Stack Developer (promoted from MERN Intern)

Systems Limited | Nov 2018 – Nov 2019 | On-site, Pakistan

- Built full web applications with React.js, Node.js, and Express; designed REST APIs and JWT authentication.
- Worked with MongoDB/MySQL in an Agile, Git-based workflow alongside designers and senior engineers.

SELECTED PROJECTS

Enterprise Knowledge Management Platform — *Python, FastAPI, PostgreSQL, React.js, Docker, AWS*

- Scalable platform for enterprise knowledge and documentation with FastAPI document storage/search, role-based auth, cloud storage integration, and a React.js UI; containerized and deployed on AWS.

Microservices-Based Order Management System — *Node.js, Express.js, FastAPI, PostgreSQL, Redis, Docker*

- Distributed order-processing, inventory, and payment-coordination services with REST inter-service communication, Redis caching, monitoring, and Docker-based deployment.

Real-Time Data Processing Pipeline — *Python, Pandas, FastAPI, PostgreSQL, Docker, AWS*

- Backend system for large-dataset transformation with Pandas processing modules, FastAPI endpoints, scheduled jobs, and optimized queries in a containerized environment.

EDUCATION

BS, Computer Science — University of Management and Technology (UMT)
2014 – 2018 | Lahore, Pakistan
